

# Frequent Questions

## **What websites do you work with?**

We work with high quality websites, which have at least 100 hosts a day. The only exceptions are websites for kids, adult websites, those containing malicious codes or oversaturated with ads. Besides, we define simulated (bot-infected) traffic as unacceptable. We add such websites to a blacklist and freeze all payments.

## **How much will I earn?**

Your income depends on the website's topic, geography of visitors, quality of traffic and position of banners. We suggest a technology that allows an objective estimation of your traffic cost.

## **What banner formats to choose?**

We offer both standard and exclusive banner formats. It is obvious that exclusive ones allow earning more than standard. You can also check out our flagman format on [www.rich-screen.com](http://www.rich-screen.com)

## **What's the minimum payment amount?**

Minimum payment amount totals 50 EUR or an equivalent in account currency. All payments are done on NET 30 Basis Payment.

## **What payment methods are used?**

We pay by means of a bank transfer, WebMoney or PayPal.

## **What sort of material will be shown on my website?**

We strictly moderate all our advertisers and never work with suspicious services, shockvertising and ads with erotic content.

## **Can I control advertisers?**

Yes, you can monitor all active and inactive advertisers. You can also block inappropriate and inactive ones.

## **How to start cooperation?**

Get registered at our advertising platform and connect your website. After the moderation you will need to set up a special JS code to your website. This code is needed to rotate ads on your website. The code setup doesn't influence website position of search engine results and is absolutely safe for the server and visitors.
